

## Volunteer Database Report

This year a Volunteer Director and Portfolio was established in order to expand the DHBTC number of volunteers to assist the club in running different activities and maintaining the trail and conservancy properties.

A volunteer database on the club website had been in place before this but during this year improving the database as a working document and expanding the Volunteer numbers was established as one of the Clubs key goals. This project is ongoing.

I started as Director but now this portfolio will be spearheaded by Marianne Dzuba as Volunteer Director with myself as assistant.
